

**MAD & PWA Lab**  
**Journal**

Experiment No.	06
Experiment Title	To Connect Flutter UI with fireBase database
Roll No.	25
Name	Siddhant Jha
Class	D15B
Subject	MAD & PWA Lab
Lab Outcome	LO3: Analyze and Build production ready Flutter App by incorporating backend services and deploying on Android / iOS
Gender:	

3) Download google-services.json file and place it in android/app/ directory .

4) Update build.gradle

5) Initialize using main.dart

### Conclusion:

By integrating firebase with Gmpst flutter app, we unlocked essential backend capabilities. This step enables the app to scale further with secure authentication, real-time handling and user analytics.
