| Experiment No. | 05 |
| Experiment Title. | To apply navigation, routing and gestures in Flutter App |
| Roll No. | 25 |
| Name | Siddharth Jha |
| Class | D15B |
| Subject | MAD & PWA Lab |
| Lab Outcome | LO2: Design and Develop interactive Flutter App by using widgets, layouts, gestures and animation |
| Grade: |  (A) |

Steps:

- 1) Create multiple screens for navigation.
- 2) Configure routing in MaterialApp widget with named routes or use direct navigation.
- 3) Use Navigator.push() to move to another screen.
- 4) Add interactive buttons or icons to trigger navigation.

Conclusion:

This experiment successfully demonstrated screen navigation and user gesture handling within the ~~Complete~~ Flutter app. Through proper routing and gesture recognition
